## WHOLESALE CATALOGUE

*Of the Leading Specialties in*

### Plants, Shrubs and Hardy Mountain Cacti

INDIGENOUS TO THE

### ROCKY MOUNTAINS OF COLORADO

D. M. ANDREWS

*Introducer of Native Colorado Plants*

Boulder, Colorado, U. S. A.

**TERMS AND CONDITIONS.** We take this opportunity to thank one and all for liberal patronage and to announce that we are better than ever prepared to meet the rapidly increasing demand for our plants from the plains and mountains of Colorado.

This list cancels previous quotations. Prices are net for quantities named, except that 5, 50 and 250 will be supplied at the ten, hundred and thousand rates respectively. Where long lists of fewer than five of a kind are required a moderate additional charge will be made for packing. The same will apply on orders of less than \$2.00 and on plants sent by "Sample Post" to foreign countries. In all other cases, except as above, packing and boxes are included in the price.

Always state with the order full information in regard to manner and time of shipment. Plants of a very perishable nature must be forwarded by express or mail except at the sole risk of consignee. It is sometimes advisable therefore to send a few items of an order by mail or express and the bulky portion by freight in order to save expense in transportation.

Accounts are due upon delivery except by previous arrangement. Orders from parties unknown to us should be accompanied by cash or first class references.

**CERTIFICATE OF INSPECTION.** Our nurseries and premises have been officially inspected and found entirely free from San Jose Scale or any other dangerous insect or disease. A copy of certificate will be furnished with every shipment. No San Jose Scale has yet been reported from any part of Colorado according to the statement of Prof. Gillett of the State Experiment Station.

## HARDY MOUNTAIN CACTI

All the kinds we offer are very hardy and will stand the winters of New York, Massachusetts, etc., outside without protection. They have been used extensively by parks and estates with complete success. They can be utilized in many ways and are especially adapted to bleak exposed positions where the soil is very sandy, stony or otherwise unpromising. *Yucca glauca*, *Malvastrum*, *Rhus trilobata*, etc., are also recommended for similar positions.

	Price per	10	100	1000
<i>Cactus Missouriensis</i>		\$0.75	\$6.00	\$

## GENERAL LIST OF PERENNIAL PLANTS

Among the following are plants adapted to almost every condition where plants will survive. We shall be pleased to name such as will be best suited to any described situation. This list includes only such plants as we can recommend for general planting and which will succeed under ordinary care and conditions. Our "collected" plants are carefully dug, and carefully handled to avoid exposure of the roots. All "collected" stock that we offer is well rooted and will give good satisfaction. These remarks will apply also to our list of "Colorado Shrubs" of this catalogue.

	Price per	10	100	1000
<i>Aconitum autumnale</i> Reichb. Late. flowers large, pur- plish blue, very handsome		\$0.75	\$6.00	\$50.00
<i>Aconitum Fischeri</i> Reichb. (not Watson). Earlier than the last flowers bright blue, very large, foliage glossy		.75	6.00	45.00
<i>Anemone patens Nuttalliana</i> . Very large early flowers, bluish lilac. Strong collected.		.50	1.50	10.00
<i>Aquilegia coerulea</i> James. The true Rocky Mountain Columbine, pure native stock. The best way to handle this magnificent plant is to obtain the collect- ed plants the last of September and pot them or set in frames; they will then become well rooted so that they can be handled with ball of earth the following				

	Price per	10	100	1000
spring. We will make very special prices on large lots for September delivery. We have a limited supply of strong transplanted stock at	.75	6.00		
Choice collected		4.00	30.00	
<i>Aquilegia</i> , long spurred hybrids. A very choice strain; light seedlings,	.25	1.50		
<i>Aquilegia chrysantha alba</i> . Strong seedlings	.30	2.50		
<i>Artemisia frigida</i> Willd. Whitish fringed foliage, fine for edging or ground cover. Will grow in very dry places. (per 10,000 \$75.00.)	.50	1.25	10.00	
<i>Artemisia gnaphaloides</i> Nutt. Entire whitish foliage, effective,	.50	2.00	15.00	
<i>Artemisia Ludoviciana</i> Nutt. Similar to last but foliage laciniate	.50	2.00	15.00	
<i>Aster commutatus</i> Gray. Profuse bloomer, flowers white, plant dwarf, valuable sort,	.50	2.00	15.00	
<i>Aster foliaceus</i> Lindl. A remarkable dwarf species of vigorous growth, handsome smooth foliage, unusually large flowers with numerous rather broad purplish rays. Blooms in June or July and continues throwing up new flower stems until frost. It is persistently perennial and entirely hardy and thrives in any good garden soil. Well rooted divisions,	.75	5.00	40.00	
<i>Brickellia grandiflora</i> Nutt. Unique tassel shaped pendant flower heads.	.75	5.00		
<i>Cacalia tuberosa</i> Nutt. A magnificent perennial species, throwing up huge, feathery white panicles 4 feet tall and 2 feet broad; very showy, neat and desirable,	.75	6.00		
<i>Calochortus Gunnisoni</i> Wats. One of the best and hardiest of Mariposa Lilies, flowers very large, white with greenish purple centers. Ready for delivery in August and September only,	.50	3.00	25.00	
<i>Clematis Davidiana</i> Decne. Seedlings,	.50	2.50		
<i>Clematis Douglasii</i> Hook. Non-climbing, flowers bell-shaped, deep purple	.50	3.00	25.00	
<i>Clematis Fremontii</i> Wats. Flowers nodding, bell-shaped, creamy white to deep purple, produced freely all summer from low bushy plants with ample foliage. Extra strong clumps which will bloom freely first year.	.75	6.00	50.00	
<i>Dodecatheon pauciflorum</i> Greene. Flowers rose purple	.35	1.25	10.00	
<i>Delphinium bicolor</i> Nutt. Very early, dwarf, flowers showy, deep blue. (5,000 for \$50.00.)	.50	2.00	15.00	
<i>Delphinium albescens</i> Ryd. ( <i>D. azureum album</i> Hort. Flowers white in long slender spikes. (5,000 for \$60.00)	.50	2.00	15.00	
<i>Delphinium Geyeri</i> Greene. ( <i>D. Scopulorum</i> of Coulter's Manual in part.) Flowers large, bright deep blue, very showy,	1.00	6.00	40.00	
<i>Echinacea purpurea</i> Moench.	.75	5.00		
<i>Eriogonum umbellatum</i> Torr.	.50	2.50	20.00	
<i>Eryngium yuccaefolium</i> Michx. Heavy,	.50	4.00		

	Price per	10	100	1000
<i>Gentiana Bigelovii</i> Gray. Clustered, free bloomer.				
clumps	.75	4.00		
2 year seedlings	.30	2.50	20.00	
<i>Geranium Fremontii</i> Torr. All summer,	.50	3.00	20.00	
<i>Geranium pratense album</i>	1.00			
<i>Geranium sanguineum</i> L.	.50	3.00		
<i>Helianthus Maximiliani</i> Schrad. Large radiate yellow flowers, nearly the whole length of stem which is often 10 feet,	.75	3.00		
<i>Helianthella quinquinervis</i> Gray. Light yellow radiate flowers, 5 inches across, early; fine distinct sort	1.00			
1 year seedlings	.25	2.00		
<i>Heuchera Sanguinea alba</i> Heavy clumps	1.00			
<i>Heuchera bracteata</i> Ser. Low evergreen sort with dense spikes of straw-colored flowers,	.50	3.00	18.00	
<i>Hydrophyllum occidetale</i> Gray.	.50	2.50	20.00	
<i>Iris Missouriensis</i> Nutt.	.30	2.00	12.00	
<i>Leucocrinum Montanum</i> Nutt. An exquisite liliaceous plant producing a long succession of very fragrant crystal-white flowers at the surface of the ground. More than fifty buds have been counted on a clump at one time. Easily grown and perfectly hardy,	.50	3.00	15.00	
Orders booked now for September delivery at the special price of 1,000 for \$12; 10,000 for \$100.				
<i>Liatris punctata</i> Hook. One foot tall, flowers nearly whole length of stem,	.35	1.50	10.00	
<i>Liatris scariosa</i> (early Colorado form)	.75	4.00		
<i>Lithospermum multiflorum</i> Torr. Numerous Phlox-like yellow flowers. Old plants send up many flower stems which produce a multitude of brilliant blossoms during the season. Strong transplanted	1.00	8.00		
Fine collected	.75	5.00		
<i>Malvastrum coccineum</i> Gray. Dwarf, flowers bright scarlet,	.50	3.00	20.00	
<i>Mertensia ciliata</i> (M. Siberica of Coulter's Manual, not Don.) Very handsome plant, blooms all summer, succeeds in any good garden soil; heavy clumps	.75	6.00		
<i>Mertensia lanceolata</i> D. C. Collected.	.75	5.00		
<i>Monarda menthaefolia</i> Graham. A handsome sort that will grow in very dry places,	.50	2.00	18.00	
<i>Oenothera albicaulis</i> Nutt.	.50	3.00	25.00	
<i>Oenothera brachycarpa</i> Gray.	.50	3.00	25.00	
<i>Oenothera caespitosa</i> Nutt.	.50	3.00	25.00	
<i>Oenothera serrulata</i> Nutt.	.50	3.00	25.00	
<i>Pentstemon acuminatus</i> Dougl.	.50	4.00		
<i>Pentstemon Barbatus</i> Nutt. Fine scarlet	.75	5.00		
<i>Pentstemon coeruleus</i> Nutt. A very desirable dwarf sort with showy sky-blue flowers which we can now offer in large quantities. (10,000 for \$75.)	.50	2.00	10.00	
<i>Pentstemon gracilis</i> Nutt.	1.00			
<i>Pentstemon glaber</i> Pursh. A tall sort with large deep bluish purple flowers. 10,000 for \$75.)	.50	2.00	10.00	

	Price per	10	100	1000
<i>Pentstemon glaber alpinus</i> Gray. Dwarf, flowers large blue, very showy. Rare.	1.50			
<i>Pentstemon humilis</i> Nutt. Flowers dark blue, plant dwarf. (10,000 for \$75.)	.50	2.00	10.00	
<i>Physostegia Virginica alba</i> . Well rooted divisions.	.25	2.00	16.00	
<i>Rudbeckia ampla</i> Nelson. Tall and stout, flowers large, with drooping yellow rays,	.75	3.50		
<i>Salvia azurea grandiflora</i> Benth. Tall, with narrow foliage and a profusion of pale azure blue flowers, fine for cutting	.50	3.00		
<i>Salvia Pitcheri</i> Torr. Similar but flowers bright deep blue, later; both are extremely hardy	1.50			
<i>Sidalcea candida</i> Gray.	.30	2.00	18.00	
<i>Solidago spectabilis</i> Gray. Does not spread from the root, but soon forms dense clumps throwing up numerous large symmetrical panicles of richly colored fragrant yellow flowers. A splendid plant and dainty enough for the choicest border. We consider it by far the best species. Strong clumps	.75	5.00		
Collected	.50	3.00		
<i>Tradescantia brevecaulis</i> Raf.	.50	3.00		
<i>Tradescantia brevecaulis</i> (Red flowered) Very handsome dwarf sort blooms all summer	1.00			
<i>Tradescantia occidentalis</i> Britton.	.40	2.00	15.00	
<i>Tradescantia reflexa</i> Raf.	1.00			
<i>Valeriana septentrionalis</i> Richards Very neat plant with snowy white flowers very early in spring. Interesting and desirable	1.00	8.00		
<i>Viola canina adunca</i>	.35	2.00	16.00	
<i>Viola cognata</i> Greene. Fine blue flowered, profuse bloomer, vigorous plant,	.50	2.50	20.00	
<i>Viola Nuttallii</i> Pursh. Early long-blooming sort. yellow flowers, upper petals tinged purple,	.50	3.00	25.00	
<i>Viola Rydbergii</i> Greene. (V. Canadensis of Coulter's Manual not L.) This is distinct from the eastern V. Canadensis, being a stronger and more vigorous plant, a better bloomer, producing flowers nearly all summer. We consider this one of three or four best hardy Violets	.50	3.00	25.00	
<i>Yucca glauca</i> Nutt. (Y. angustifolia Pursh) We consider this the one most valuable plant on our list. It is the hardiest Yucca, will thrive in any reasonable position excepting where it is very wet. It may be used with our hardy Mountain Cacti for variety and is equally suitable for massing or for single specimens in the hardy border or elsewhere. The foliage is very stiff and straight, silver edged. The large white or tinted flowers gracefully drooping from the tall simple stems complete a picture not easily forgotten. We offer very strong, single crown collected plants with handsome symmetrical heads and well rooted	.75	5.00	40.00
